

Project Requirement: Subscription & Payment Integration

Overview:

Existing app has login, registration, question bank, exam system, and video solutions.

Need to add subscription-based premium access.

Subscription Packages:

- 3 Months
- 6 Months
- 12 Months

Premium Access Includes:

- All questions
- All exams
- All video solutions

Some content will remain free.

Payment Methods:

- bKash
- Google Play Billing

Payment Page:

- Course intro video
- Course description
- Package selection
- Price display
- Promo code input
- Payment method selection
- Pay Now button

Promo Code:

- Percentage or fixed discount
- Expiry validation

- Usage limit

Backend:

Subscriptions Table:

user_id, package_type, start_date, end_date, status

Payments Table:

user_id, amount, method, transaction_id, status

Promo Codes Table:

code, discount_type, discount_value, expiry_date, usage_limit

Access Control:

Active subscription → full access

No subscription → locked content

Payment Flow:

Select package → Apply promo → Pay → Verify → Activate subscription

Admin Panel:

- Manage packages
- View payments
- Manage promo codes
- Check user subscriptions

Important:

- Server-side payment verification
- Prevent duplicate transactions
- Auto-expire subscriptions
